Category scores

Area	Score	Rating	
Video	93	delivery ready	
Audio	100	delivery ready	
Subtitles	0	not deliverable	
Structure	78	needs work	

What needs to be fixed

#	Severity	Issue	Measured	Required
1	FAIL	Subtitle / caption track present	none	at least one track
2	REVIEW	Runtime	00:00:30	> 60 min for a feature
3	REVIEW	Colour primaries / transfer / matrix	missing: primaries, transfer, matrix	—
4	REVIEW	Unexpected black	1 segments	<= 8s each
5	REVIEW	Metadata completeness	missing: title	populated

Findings in detail

FAIL 1. Subtitle / caption track present (subtitles)

No subtitle or caption track found, and no sidecar file supplied.

Suggested fix: Attach the sidecar subtitle file or embed the caption track. Most streaming targets reject delivery without one.

REVIEW 2. Runtime (structure)

Runtime is 00:00:30 — short for a feature. Confirm this is the full picture and not a reel or excerpt.

Suggested fix: Confirm the runtime matches the delivery paperwork. A mismatch means a missing or duplicated reel.

REVIEW 3. Colour primaries / transfer / matrix (video)

Colour primaries, transfer, matrix not tagged.

Suggested fix: Rewrap with explicit colour tags (e.g. bt709 / bt709 / bt709). Untagged masters get misinterpreted downstream.

REVIEW 4. Unexpected black (video)

1 short black segment(s) inside the picture — confirm these are intentional transitions.

Suggested fix: Confirm these are intentional. Mid-content black longer than the spec limit reads as a dropout to automated QC.

Timecode	Detail
00:00:20:00	6.0s

REVIEW 5. Metadata completeness (structure)

Missing metadata field(s): title.

Suggested fix: Populate title, aspect ratio and creation metadata at rewrap.

Source file specification

Container	mov,mp4,m4a,3gp,3g2,mj2
Video codec	h264 · yuvj420p · 8-bit
Raster / rate	1920x1080 @ 24.0 fps
Runtime	00:00:30
Start timecode	not present
File size	0.02 GB
Subtitle tracks	0
